

EN1090 Certification

Enhance your know-how and ensure CE marking for your metallic constructions

Certification for your Factory Production Control (FPC) system according to EN1090 contributes to your company's success.

It allows you to market your products with a CE marking that certifies compliance with the Construction Products Regulation.

The benefits

- Increased trust from your customers
- Response to regulatory obligations
- Involvement of the personnel
- Progress-oriented approach
- Removal of commercial barriers
- Opening up to new markets

The procedures

EN1090 certification is a voluntary approach. The standard takes account of the following themes:

- Quality: non-conformities and corrective actions, traceability,
- Review of the requirements, technical and subcontracting review,
- Organisation of workshops and process management,
- Welding coordination,
- Skills of the personnel,
- Inspection and/or verification of welding equipment.

According to the products manufactured, the materials used, the company will choose from the standards:

- Steel EN1090-2
- Aluminium EN1090-3
- and execution classes from EXC1 to EXC4.

Combined certifications

Standard EN1090 can be used independently or integrated into any other management system. EN1090 certification can be combined with other certifications (ISO 3834, ISO 15085 or certifications of management systems ISO 9001, ISO 14001, ISO 45001).
