

ISO 18788 Certification

Management system of private security operations

The certification of your safety management system according to ISO 18788 standard allow to optimize the efficiency of your private security operations.

The benefits

- Provide an organizational framework for managing activities and risks for organizations leading or sub-contracting security operations.
- Demonstrate a professional conduct of security operations to satisfy customers and other stakeholders.
- Allow organizations and users of security services to prove their commitment towards legal obligations and good identified practices.
- Demonstrate its ability to constantly offer services that meet customer needs and are in compliance with international, national and local laws, as well as human rights requirements.

The terms and conditions

The ISO 18788 certification is a voluntary approach. The standard takes into account the following issues:

- **Definition of the operational framework:** context, needs and requirements, definition of risk criteria, definition of the scope of application.
- **Policy:** commitment of management, commitment to the protection of human rights, commitment of resources, commitment to continuous improvement.
- **Planning:** risk assessment, legal requirements, risk management strategy.
- **Implementation and execution of operational activities:** operational control, skills, communication, role and responsibilities, prevention and management of adverse or disturbing events.
- **Performance assessment:** conformity assessment and system performance, exercises and tests, internal audits, management review.

The combined certifications

The ISO 18788 standard can be used in an independent way or integrated with any other management system. The ISO 18788 certification can be combined with other certifications (ISO 9001, ISO 14001, ISO 45001) and coordinated audits et les audits coordonnés.
