

ISO 27001 Certification

Information system security management

Protect your data !

In the current context of an increase in the risks of loss or leakage of data, through a proven methodology, ISO 27001 certification allows you to establish an information system security management system.

The auditor will in particular focus on examining with you your risk analysis, through the Confidentiality, Integrity, Data availability triptych. The implementing of security measures, the most «practical» section of the certification, is then audited.

The benefits

- Identify the risks that bear down on your structure, on your data
- Set up the correct actions to protect your data
- Enhance your image
- Meet the stakes of your customers
- Increase employee responsibility
- Demonstrate your compliance with national and international legislation

The procedures

ISO 27001 certification is a voluntary certification. To apply for certification in the best conditions, it is desirable :

- that your system has been in place for at least 6 months,
- that an internal audit has been conducted,
- that a management review has been conducted.

It is intended for any type of organisation, irrespective of their size, organisation, activity sector.

Validity of the Certificate

3 years, with annual follow-up audit.

Combined certifications

ISO 27001 certification is often associated with ISO 22301 certification - business continuity management system, but you can also group it together with any management system certification (ISO 9001 - Quality, ISO 14001 - Environment, etc.).

The certification process

1	Certification Request
2	Planning
3	Initial audit
4	Certification decision
5	Issuing of the Certificate
6	Annual follow-up audit

Apave Certification

Apave Certification, a subsidiary of Apave Group, offers certification services for management systems (ISO 18788, ISO 9001, ISO 14001, ISO 45001...), products and services, skills, as well as labels and evaluations. It relies on a network of qualified internal and external auditors, spread over the French territory and abroad, and works in the voluntary framework as well as in the regulatory framework. Recognised and independent body (third party), Apave Certification provides written assurance that organisations, processes, products, services or skills of persons are compliant with the requirements specified in the standards (standard, regulation, specification technique, etc.).
