

ISO 50001 Certification

Improve your energy performance!

The certification of your energy management system according to the ISO 50001 standard allows you to prove that you comply with the energy efficiency policy that you have set.

The benefits

- Identification of energy saving potentials;
- Establishment of an action plan;
- Improvement in efficiency and energy use;
- Decrease in energy consumption and costs;
- Decrease in greenhouse gas emissions;
- Involvement of all staff in a unifying project.

The terms and conditions

The ISO 50001 standard is a voluntary approach. To apply for certification in the best conditions, it is better that:

- your energy management system has been alive for 6 months,
- to realised an internal audit,
- a management review has been realized.

It is addressed to organizations of all types and sizes, regardless of geographical, cultural and social conditions.

The combined certifications

The ISO 50001 standard on energy management system can be used independently or in an integrated way to any other management system. Its structure is similar to the ISO 140001 one.

The ISO 50001 certification can be combined with other certifications (ISO 9001, ISO 14001, ISO 45001) and coordinated audits.

The certification process

1	Certification request
2	Planning
3	Initial Audit
4	Decision making
5	Certificate issued
6	Annual follow-up audit

Apave Certification

APAVE Certification, a subsidiary of the APAVE Group specialized in certification, offers management systems certification services (ISO 9001, ISO 14001, ISO 50001, ISO 45001). APAVE Certification relies on a network of qualified auditors, internal and external, spread over national territory.

APAVE Certifications operates in the voluntary sector as in the regulatory sector.

Apave Certification is a recognized and independent (third party) organization, giving written assurance that an organization, a process, a product, a service or skills of an individual complies with the requirements specified in the reference frameworks (standards, regulations, technical specifications, etc.).
